

Matthew Lee		Full-Stack Developer with experience in Frontend/Game design, Backend implementation and Cloud	
Personal Info		Work Experience	
Email matthewylee2@gmail.com LinkedIn https://www.linkedin.com/in/matthew-lee-b9583b199/ Portfolio https://matthewylee.dev/		<u>Junior Software Engineer</u> March – June 2024 <u>ClaimsGate</u> Claimsgate provides a client portal enabling seamless access to ongoing cases and legal services. - Developed an extension to ClaimsGate's identity verification and client onboarding system by implementing new registration forms in VueJs as well as updating Firebase Functions that parse the form/csv data provided by the frontend. - Migrated and improved existing “export to csv” feature from the VueJs frontend to Firebase Functions backend to allow clients to export batches of csv data. This offloaded computation, improving the UI's speed and enhancing user experience. - Designed and maintained new Firebase Functions, Bootstrap and Vuejs components for a new ticketing system. Allows other lawfirms and clients to issue ticket requests to ClaimsGate as well as to each other.	
Languages (proficient)			
- Javascript & Typescript - Python - Java / Kotlin - Bash			
Languages (familiar)			
- C / C++ - Go - SQL - Dart		<u>Software Engineer Intern</u> June – August 2023 <u>Zombiecrafter</u> A game plugin for Minecraft similar to Call of Duty – Zombies - Designed and rewrote the plugin's class hierarchy to organize objects with inheritance and to apply an object oriented pattern to allow for more code-re usability and cleanliness - Developed new in-game commands to allow players to quickly spawn block structures. Implemented in Kotlin using handlers that get invoked when players issue commands. - Collaborated with a team of 3 members using Git/Github to write, review and merge code.	
Frameworks and Tools			
- VueJs - React / React Native - Flutter - Vite / Vitest - NextJs - AdonisJs - Tailwind CSS - PWA (WebAssembly) - Python Flask - ExpressJs - Gradle, Maven - Terraform - Docker - AWS EC2, ECR, S3, etc - Firebase - Git (ops and versioning) - Github/Concourse Pipe-lining		<u>Freelance Contractor</u> Sept 2020 <u>OXCHIBUS</u> Historical map of Chinese businesses in Oxfordshire county, UK between 1910 – 1980. - Worked with OXCHIBUS to understand requirements and set delivery timelines for the development of a new website for OXCHIBUS. Website is an archive of historical Chinese businesses. - Created a workflow for users to submit requests to add map pins representing various historical Chinese businesses in the local area. - Implemented using VueJs, Firebase Storage, Functions, Google Maps API. As well as integrated SendGrid API to send email notifications.	
		Education	
		<u>HarvardX CS50x</u> 2022 - Awarded Certificate of Computer Science for CS50x. <u>Oxford Brookes University</u> 2018 – 2022 BSc in Anthropology	
		Personal Projects	
		<u>HouseM8s</u> - Designed and developed a PWA for facilitating task management between roommates Aimed to simplify the division of shared living tasks such as chores, groceries, etc. - Implemented user account creation, authentication, task creation, task assigning using a CRUD design with a MongoDB database. - Used Web Sockets for real time updates tracking ongoing tasks and marking of completion. - Developed with VueJs, NuxtJs, PWA, Tailwind, ExpressJs, Vitest and built using Vite. <u>ArcaneWonders Minecraft Java Plugin</u> - Developed a Minecraft Plugin using Kotlin implementing various in-game teleportation methods for players to travel across the world and to other users. - Implemented using inheritance pattern on existing Minecraft item class objects such as the “stick” and writing custom event listeners and functions to make it into a “wand’ to be able to create portals. - Portal graphics were created by computing a range of particle locations and spawning “redstone” dust particles to create desired portal aesthetic look.	
Technical Skills			
- Familiar with Unix style systems. - Good knowledge of OO design and implementation of design patterns. - Good foundation in data structures and coding practices. - Familiar with test driven development and test automation. - Experience with build automation and cross compilation. - Experienced in Full-stack web development and protocols such as HTTPS, SSH, Web sockets.
